

Raj Bhokare

Web Developer

Pune, Maharashtra, India — +91-84597-63914 — bhokareraj281@gmail.com

Portfolio — [GitHub](#) — [LinkedIn](#) — [LeetCode](#)

Career Objective

Software Engineering undergraduate seeking a Software Development Engineer (Web) Internship / Full Stack Developer Internship. Skilled in React.js, Node.js, Express.js, and MySQL, with 200+ Data Structures and Algorithms problems solved. Experienced building and deploying REST APIs and full-stack web applications, version-controlled through Git and GitHub in Agile team workflows.

Technical Skills

Languages: Java, Python, C, C++, JavaScript, SQL

Frontend Development: HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS, EJS, jQuery, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Development, CRUD Operations, PHP

Databases: MySQL, Relational Database Design, Schema Design

Tools & Platforms: Git, GitHub, VS Code, Cursor, GitHub Copilot, Postman, Firebase, Vercel, Render, Linux

AI-Assisted Development: Claude, ChatGPT, GitHub Copilot – for code generation, debugging, and documentation

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, REST APIs, Software Development Life Cycle, Agile Methodology, Debugging, Testing

Experience

Web Developer

Sep 2025 – Present

Binary Brains Club, DIT Pune

- Built responsive, cross-browser frontend interfaces using HTML, CSS, and JavaScript for 3+ club web projects, following reusable component-based coding practices.
- Collaborated with a 5-member engineering team using Git and GitHub for version control, peer code review, and iterative feature delivery in an Agile workflow.
- Integrated backend REST APIs with frontend components and resolved functional bugs through systematic testing, improving application reliability across delivered projects.

Education

Dr. D. Y. Patil Institute of Technology, Pune

2024 – Present

Bachelor of Engineering in Information Technology — CGPA: 8.71 / 10

Projects

Briefly – AI-Powered Meeting Assistant

[GitHub](#)

- Built a full-stack web application converting meeting recordings into structured summaries and action items, deployed end-to-end within a 24-hour hackathon.
- Integrated the Whisper API through a Node.js and Express.js backend to automate speech-to-text transcription and summarization pipelines.
- Designed and tested modular REST API workflows to ensure reliable performance under a time-constrained deployment.

Quizzer – Video Summarizer and Quiz Generator

[GitHub](#)

- Built a full-stack web application that extracts video transcripts and auto-generates summaries and quizzes using AI-powered content processing.
- Integrated the AssemblyAI API for speech-to-text conversion and implemented backend logic to dynamically generate quiz questions.
- Developed a responsive frontend with HTML, CSS, JavaScript, Bootstrap, and EJS, connected to backend services via REST API calls.

EduQuest – Digital Learning Platform

[GitHub](#)

- Developed a full-stack Learning Management System using Node.js, Express.js, MySQL, JavaScript, and EJS to support scalable educational workflows.
- Designed relational database schemas for users, quizzes, and progress tracking to ensure efficient data retrieval and data integrity.
- Built and tested CRUD REST APIs, integrating frontend and backend modules into a maintainable, end-to-end application architecture.

Achievements

- Solved 200+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Maintained a CGPA of 8.71 throughout the B.E. in Information Technology program.
- Delivered a full-stack solution as part of a 24-hour hackathon team (Briefly – AI-Powered Meeting Assistant).
